

Study

Risk of bias domains						
	D1	D2	D3	D4	D5	Overall
Jabre 2009						
Cinar 2011						
Punt 2014						
Smischney 2019						
Matchett 2022						
Knack 2023						
Srivilaithon 2023						
Casey 2025						
Schmidt 2025						

Domains:

- D1: Bias arising from the randomization process.
- D2: Bias due to deviations from intended intervention.
- D3: Bias due to missing outcome data.
- D4: Bias in measurement of the outcome.
- D5: Bias in selection of the reported result.

Judgement

-  High
-  Some concerns
-  Low
